

## Drift Camera Accessories

Get the most out of your new camera with our fantastic range of accessories designed exclusively for your Drift Innovation product.

	<p><b>External Power Pack - DPRPK</b> Super high capacity 11000mAh@3.7V polymer Li-ion battery. Power your Drift camera for up to 20 hours in one go. Great for iPad, iPhone 4 and 3G(S) and iTouch. Includes adaptors to charge your mobile phone, MP4, MP3 and game player, PDA, etc. Rechargeable more than 500 times.</p>		<p><b>Waterproof Case - DWPCASE</b> Protects against water, wet conditions, mud, situations with a lot of dust and stones. Waterproof up to 3m. Standard Tripod mount, so it's compatible with all existing Drift mounts. <i>also</i> <b>Replacement Lens - DWPLENS</b></p>
	<p><b>Drift Suction Cup - DSCMT</b> The Drift suction cup is the perfect accessory for mounting you Drift camera to any non-porous flat surfaces. Perfect for use on car windscreens etc. The suction cup uses a 1/4" (8mm) thread, so is also suitable for your standard compact camera. Compatible with all compact cameras with standard 1/4" (8mm) thread receptor.</p>		<p><b>Remote Control Handlebar Mount - DRMCMT</b> The Drift Remote Control Handlebar Mount allows you to mount the Drift remote control on the handlebar of you bike or Monopod Pole Cam Mount, for easy operation of the remote. Compatible with the Drift HD170 and HD170 Stealth.</p>
	<p><b>Long-Life Spare Battery - LLBAT</b> Double your recording time to 4 hours with the 1700mAh long life lithium battery. Can be used in place of the standard 1100mAh.</p>		<p><b>Standard Spare Battery - DSTBAT</b> A spare 1100mAh rechargeable lithium battery, allows you to swap when you original battery needs recharging.</p>
	<p><b>External Microphone - DMIC</b> Improve sound quality and achieve more targeted audio with an external microphone. The mic connects to the rear of the camera and is perfect for eliminating wind noise and in helmet commentary.</p>		<p><b>Rear Silicon Cover - DBOOT</b> Perfect for use with the external mic (HD170 and HD170 Stealth) or using an external power source. In order to use the external mic or power source, the rear hatch of the camera must remain open. The silicon boot is designed to fit over the camera when the hatch is open, and protects it from dust and the elements.</p>
	<p><b>Male RCA Mic-In Cable (1m) - DRCA</b> A microphone in cable allowing for connection of the Drift HD170 cameras to standard in-car intercom / inter-communication systems.</p>		<p><b>3.5mm Female Mic-In Cable (1m) - D35MM</b> A microphone in cable allowing for connection of the Drift HD170 cameras to standard 3.5mm male microphones.</p>
